

Explosive proof telephone KNEX1

— Global Industry Communications Leadership Brand —

Features

- IECEx certified
- 2. Type Ex e ib mb I IC T6 Gb.
- 3. Waterproof degree IP66
- 4. Analogue telephone matching with most PABX, PBX and PAX system
- 5. Telephone line powered. No external power or battery required
- 6. Robust SMC 2600 glassfibre reinforced polyester die-cast body
- 7. LCD display, SUS Metal keypad 24digit, Magnetic reed hook-switch
- 8. Busy tone detection for auto release the line if line busy
- 9. High temperature approval, Auto answer auto release line.
- 10. Full Soft lock: only dial out from phone book 50 memory address number
- 11. Half soft lock: limit to dial out starting number, e.g. "00852" area code
- 12. Ring sound 95 dB dfd in 1 m and 10 ringing tone melodies selectable
- 13. Listening by loudspeaker: 70dB in 1m
- 14. Phone book memory: 50 address (name & number) programmable

LCD display include

- Manual setting
- Welcome text programmable e.g: welcome to koontech telephone
- Full soft lock or half soft lock
- Phone book up to 50 address number selectable
- Ring speaker up to 4 level selectable
- Hands free talking sound up to 4 level selectable
- Handset receiver sound up to 4 level selectable
- Up to 9 Ring tone melodies selectable
- ❖ Back light up to 4 level selectable
- The dialing number
- Calling time counting

Specification

Unit dimension 227 x 293 x 135mm Unit Weight 5.8kg LCD Display: 2 line alphanumerical display ICON or number or letter Up to 4 level back light selectable Keypad stainless steel flash mount Waterproof IP66. Ice protection 21 keys with number and ACE letter for program Handset: dynamic receiver with inductive coupling for hearing aids Electret type microphone with noice cancelling Stainless steel armoured handset hold over 170kg Waterproof protection IK09 Call Flash transfer: max:120ms Dialling procedure: DTMF External function (Option): external louder speaker additional earpiece headset ringl sounder operation temperature: -25 ℃ to 60 ℃ Storage temperature: -30 ℃ to +70 ℃		
LCD Display: 2 line alphanumerical display ICON or number or letter Up to 4 level back light selectable Keypad stainless steel flash mount Waterproof IP66. Ice protection 21 keys with number and ACE letter for program Handset: dynamic receiver with inductive coupling for hearing aids Electret type microphone with noice cancelling Stainless steel armoured handset hold over 170kg Waterproof protection IK09 Call Flash transfer: max:120ms Dialling procedure: DTMF External function (Option): external louder speaker additional earpiece headset ringl sounder operation temperature: -25 ℃ to 60 ℃	Unit dimension	227 x 293 x 135mm
Up to 4 level back light selectable Keypad stainless steel flash mount Waterproof IP66. Ice protection 21 keys with number and ACE letter for program Handset: dynamic receiver with inductive coupling for hearing aids Electret type microphone with noice cancelling Stainless steel armoured handset hold over 170kg Waterproof protection IK09 Call Flash transfer: max:120ms Dialling procedure: DTMF External function external louder speaker additional earpiece headset ringl sounder operation temperature: -25 ℃ to 60 ℃	Unit Weight	5.8kg
Keypad stainless steel flash mount Waterproof IP66. Ice protection 21 keys with number and ACE letter for program Handset: dynamic receiver with inductive coupling for hearing aids Electret type microphone with noice cancelling Stainless steel armoured handset hold over 170kg Waterproof protection IP66 Impact protection: IK09 Call Flash transfer: max:120ms Dialling procedure: DTMF External function (Option): external louder speaker additional earpiece headset ringl sounder operation temperature: -25 °C to 60 °C	LCD Display:	2 line alphanumerical display ICON or number or letter
21 keys with number and ACE letter for program Handset: dynamic receiver with inductive coupling for hearing aids Electret type microphone with noice cancelling Stainless steel armoured handset hold over 170kg Waterproof protection IP66 Impact protection: IK09 Call Flash transfer: max:120ms Dialling procedure: DTMF External function external louder speaker additional earpiece headset ringl sounder operation temperature: -25 ℃ to 60 ℃		Up to 4 level back light selectable
Handset: dynamic receiver with inductive coupling for hearing aids Electret type microphone with noice cancelling Stainless steel armoured handset hold over 170kg Waterproof protection IP66 Impact protection: IK09 Call Flash transfer: max:120ms Dialling procedure: DTMF External function (Option): additional earpiece headset ringl sounder operation temperature: -25°C to 60°C	Keypad	stainless steel flash mount Waterproof IP66. Ice protection
Electret type microphone with noice cancelling Stainless steel armoured handset hold over 170kg Waterproof protection IP66 Impact protection: IK09 Call Flash transfer: max:120ms Dialling procedure: DTMF External function (Option): external louder speaker additional earpiece headset ringl sounder operation temperature: -25°C to 60°C		21 keys with number and ACE letter for program
Stainless steel armoured handset hold over 170kg Waterproof protection IP66 Impact protection: IK09 Call Flash transfer: max:120ms Dialling procedure: DTMF External function external louder speaker (Option): additional earpiece headset ringl sounder operation temperature: -25°C to 60°C	Handset:	dynamic receiver with inductive coupling for hearing aids
Waterproof protection IP66 Impact protection: IK09 Call Flash transfer: max:120ms Dialling procedure: DTMF External function external louder speaker additional earpiece headset ringl sounder operation temperature: -25℃ to 60℃		Electret type microphone with noice cancelling
Impact protection: IK09 Call Flash transfer: max:120ms Dialling procedure: DTMF External function external louder speaker (Option): additional earpiece headset ringl sounder operation temperature: -25 ℃ to 60 ℃		Stainless steel armoured handset hold over 170kg
Call Flash transfer: max:120ms Dialling procedure: DTMF External function external louder speaker (Option): additional earpiece headset ringl sounder operation temperature: -25°C to 60°C	Waterproof protection	IP66
Dialling procedure: External function (Option): additional earpiece headset ringl sounder operation temperature: -25°C to 60°C	Impact protection:	IK09
External function external louder speaker (Option): additional earpiece headset ringl sounder operation temperature: -25°C to 60°C	Call Flash transfer:	max:120ms
(Option): additional earpiece headset ringl sounder operation temperature: -25°C to 60°C	Dialling procedure:	DTMF
headset ringl sounder operation temperature: -25°C to 60°C	External function	external louder speaker
ringl sounder operation temperature: -25°C to 60°C	(Option):	additional earpiece
operation temperature: -25°C to 60°C		headset
		ringl sounder
Storage temperature: -30°C to +70°C	operation temperature:	-25℃ to 60℃
	Storage temperature:	-30°C to +70°C
