

SIP Connector A5

Summary :

Make your own 30W~60W SIP speaker or intercom station. Being highly customizable this intercom module can cover your need for VoIP anywhere.

The top complaint about voice audio in the security industry is how poor audio quality affects everything, from providing a more secure environment, to critical mistakes and inefficiencies due to inadequate communications. However, our SIP connector A5 offers HD audio quality for indoor and outdoor environments, and it can, for example, be used as a communication solution for Taxi or bus stands or station, highway call box, railway, metro, ATM machines side, tunnel, port, dock, mines, generation facilities. Plus, to improve audio quality, it features active noise cancellation and a 60W Class D amplifier.

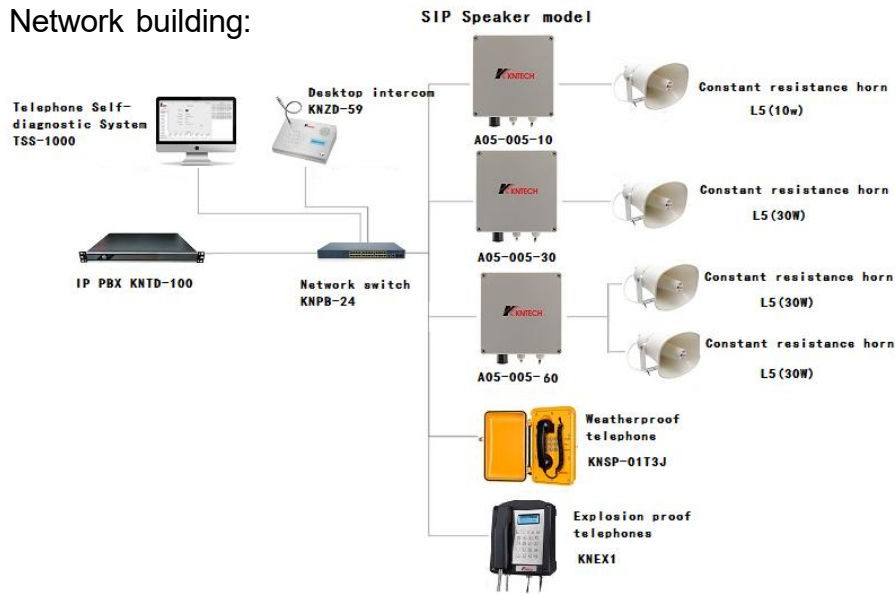

Specifications:
